

# Eco Building

Alizah Mughal

# WHAT IS SUSTAINABILITY AND HOW CAN WE IMPROVE IN IT WITHIN OUR COMMUNITY?

We can use more hydro-power, wind power and solar power because it prevents using coal which is running out.

To achieve sustainable economic growth through investment in jobs, it will help to create more opportunities making the city more skilled and will help to create a good quality of life.

Or we can recycle more. E.g. We could extract valuable metals of computers before throwing them away and stop pollution.

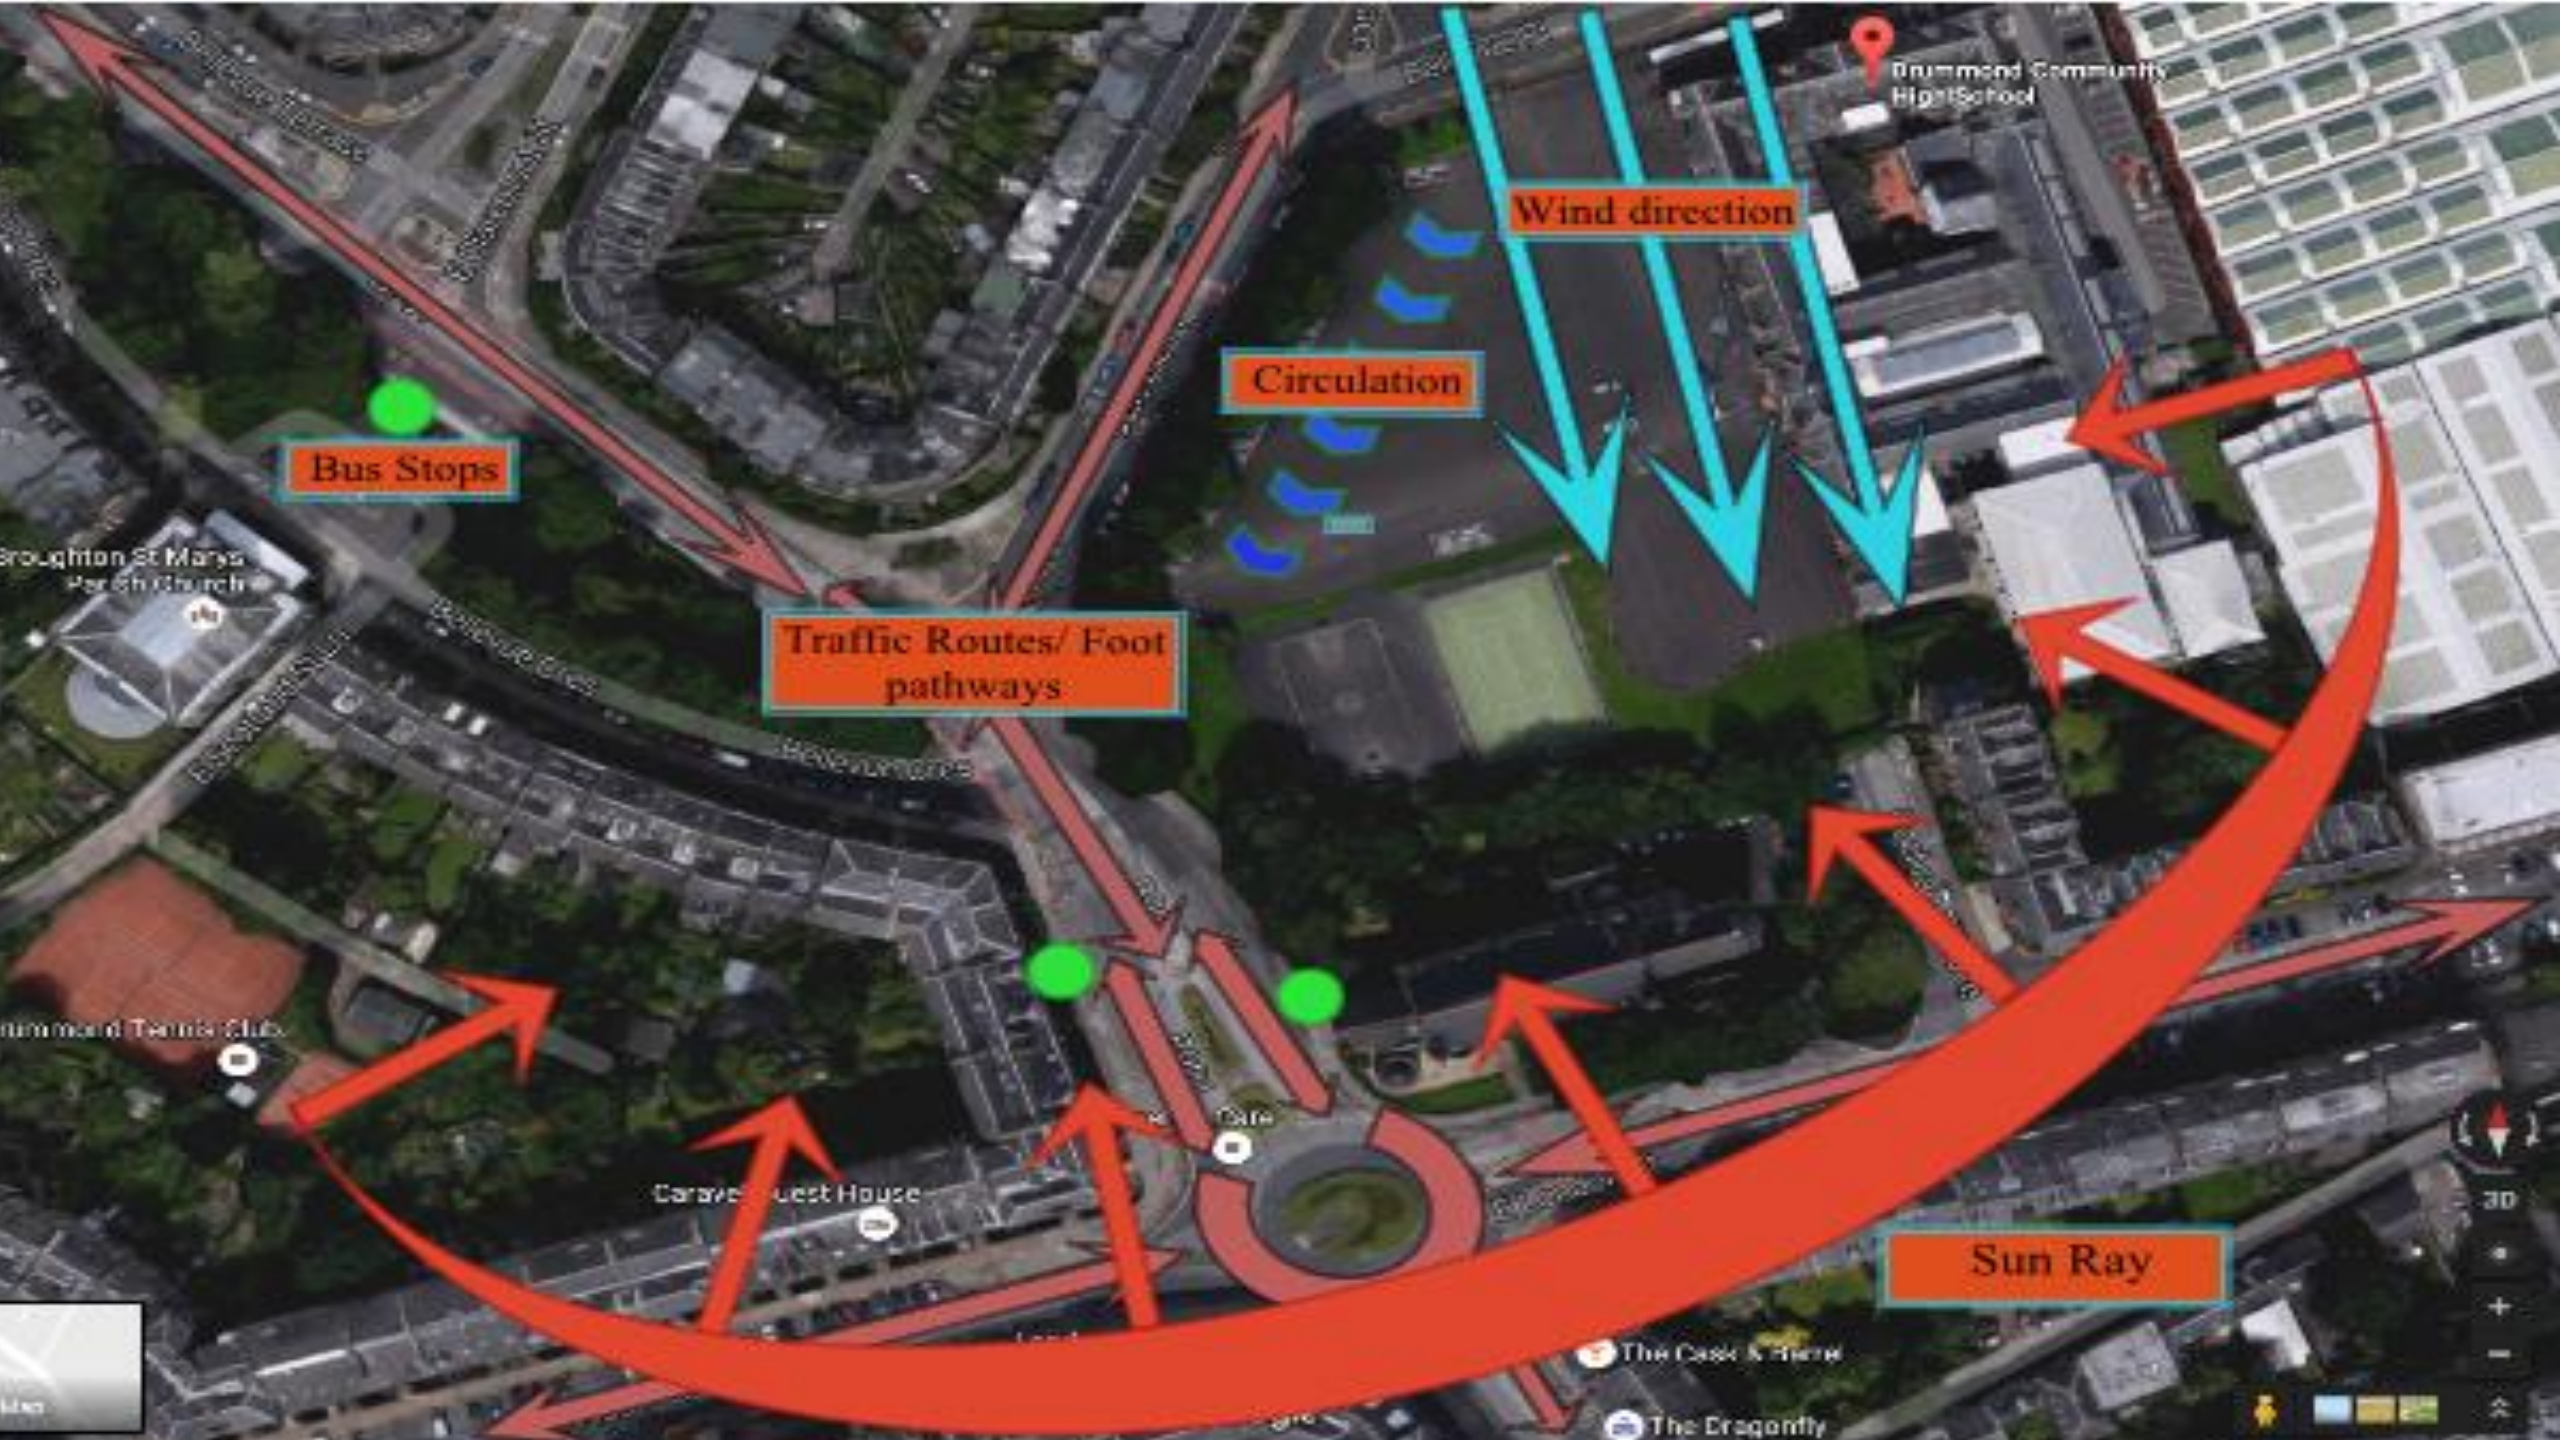

# COMMUNITY STATEMENT

*"The Eco building will be an inspiration towards the community as it will be able to show them how buildings are built within the considerations of sustainability to keep both the builders and the community happy."*

The background features abstract, overlapping green geometric shapes, primarily triangles and polygons, in various shades of green, creating a modern, layered effect on the right side of the page.
